Re: Miami County
Industrial Waste Disposal
Solid Waste

US EPA RECORDS CENTER REGION 5

Mr. Kenneth H. Driver
Hobart Brothers Co.
600 W. Main Street
Troy, Ohio 45373

June 3, 1977

Attention: Wayne Bashore

Gentlemen:

This will confirm our meeting of Wednesday, June 1, 1977, and my telephone conversation with Mr. Bashore of June 3, 1977.

An evaluation of your waste solids and sludges for disposal in a conventional sanitary landfill has been made by Mr. Gary Bramble, Mr. James Pennino and me of the Ohio EPA. It is our determination that several currently licensed landfills would be suitable for the disposal of your wastes. We recommend the following two landfills which are within a reasonable hauling distance:

1. North Sanitary Landfill (Clark County) Industrial Waste Disposal, Snyder Domer Road, West of Tremont City 1.5 miles.
2. Champaign County Landfill #1 (Champaign County), Trestle Road, North of St. Paris, 3 miles.

The sludges must be sufficiently dewatered to allow a bulldozer to push and spread the material with other wastes. The acceptance of industrial solids and sludges in sanitary landfills can only be continued as long as no public health problems, nuisances or environmental pollution problems occur.

Your cooperation in seeking acceptable disposal locations for your wastes is appreciated.

Sincerely yours,

M. Joe Moore
Land Pollution Control Section
